

Today marks a new path for this community, one with the proper control and oversight of our association that is required to really give a first-class experience to our residents. During this extensive process, we have been characterized unfairly by some, when the reality is we were and have always are just trying our best to find a new and truly effective management team and organizational structure that the residents of Somerset deserve. Unfortunately because of the current contracts in play that has restricted our community with the wonderful employees who serve our community these last few months I'm sure have been stressful and concerning regarding their future here with the association. To those employees who enjoy working for Somerset and enjoying their service here, I personally want you to know you are valued and appreciated and I encourage you to consider continuing your service to Somerset. To those of you who continue to be 100% vested in Somerset, I believe you'll find us 100% invested in you as well. This current board has invested more time than anyone could ever imagine in this new venture, and we won't be accepting anything but the best from this day forward. I would also like to express my deepest gratitude to our consultant Nancy Kerry for her exhaustive work, ensuring we do this right and end up with the right outcome, and our board president Mark for his extra commitment to this community in regards to our future management.

Jacob  
Vice President  
Somerset Board of Directors
